

+Lift
Installation

General Lifts.

About us

Situated underneath the Engineer Lane car park in large elegant premises are the offices of General Lifts. We are a local based company, who specialize in the maintenance and installation of lifts. Offering extended services and other lifting equipment ; which includes chair lifts, stair lifts, escalators and hydraulic platforms and lastly specialized lifts to overcome disability access issues. Our long list of clients includes many property owners, estate management companies, landlords and private entities, as well as, being an approved contractor for the Gibraltar Government. General Lifts also forms part of UK Lift Associations.

General Lifts was incorporated twenty years ago and our mission statement was to provide lift installation, design and maintenance services that would guarantee quick response to emergencies, reduce lift breakdown times and create local job opportunities for which they also offer specialized training.

Our experience speaks for itself.

We have been active in the sector for more than 20 years, installing and conducting maintenance on accessibility equipment, lifts and other lifting devices.

A Gibraltarian company with international expansion.

General Lifts is a sister company to General Elevadores which have offices all over Spain and countries in Europe and America.

We are the maintenance company most highly valued by its clients.

Due to our hands-on approach, involvement in each case and our personalised customer service.

We are experts in multi-brand lift maintenance.

We keep a large stock of original spare parts.

We also manufacture.

We have our own plant for the preparation of all the electronic equipment for our lifts.

We provide accessibility solutions.

We install and maintain accessibility equipment such as ramps and platforms, including our Domovil home lift.

Long call-out hours.

Our breakdown call-out hours are among the longest in the sector.

Local reinvestment.

We invest in local products, which is why our main suppliers are local.

What we provide

- + Installation of lifts and other accessibility solutions.
- + Personalised guidance.
- + R&D&I department.
- + Multi-brand maintenance service.
- + Repair and replacement with original spare parts.

What do you need?

+ Lift Installation

We will submit the proposal best suited to the needs of communities of owners and individuals in single-family homes wishing to install a lift.

We at General Lifts analyse each project on an individual basis in order to provide you with the solution best suited to your needs, for both public and private buildings, communities of owners and single-family homes.

Get to know all the types of lift we install.

Eulift

A manually operated, gearless electric lift of a standard size and high-load capacity, mainly designed for newly built standard shafts.

Familift

A hydraulic lift with a machine room or compact cabinet (with no machine room) for different loads. Ideal for special shafts with few stops up to 1600 kg, featuring an electronic valve group for a smooth stop and start, very quiet and comfortable.

Headway

A manually operated, gearless electric lift for high speeds and large load capacities. Equipment imported from our plant in Tianjin (China).

Eulift-R

A manually operated gearless electric lift of special dimensions for redevelopment with single shafts in buildings requiring the maximum use of the pit, perfectly adapted to buildings with no lifts or in which the lift needs to be replaced with a more accessible and efficient model.

Domovil

A lift from our accessibility catalogue, which we ourselves manufacture. This is a single-family residence hydraulic lift with a reduced speed of up to 0.15 m/s, specifically designed for facilities in need of an accessible piece of equipment with a few stops, combining the advantages of a Familift (smooth, quiet and comfortable) with the low consumption of a Eulift.

Isolift

A manually operated, gearless electric lift of a standard size and high-load capacity, mainly designed for newly built standard shafts, with a highly competitive price-quality ratio.

One cabin for each
environment.

+ Avant cabin

A cabin for Domovil, Eulift and Familift

A cabin decorated in galvanized sheet metal lined with satin stainless steel, non-slip rubber floors, ceilings in various finishes. A bronze mirror. A false handrail under the mirror.

+ Push-button panels

+ Control panel

With a frequency variator and programmable operation. Provides excellent travel comfort with a smooth, safe ride with no jerks or violent stops. Silent and energy efficient.

+ What if my building has no lift shaft?

Don't worry, we have the solution to that as well. We will install one on the outside of the building, on the facade or slightly away from it and connected with a walkway. We will design, manufacture and install the most suitable enclosure in accordance with your needs. We execute brick, metal plate and glass enclosures and self-supporting structures.

We analyse your lift installation project and submit a commitment-free estimate. If you accept it, we then conduct the administrative and project management procedures for the execution of the facility.

Other lift products

We also have products geared to other areas and needs, such as stretcher lifts for hospitals and residences; mini-loaders and forklifts for both individuals and restaurants, offices, hotels and hospitals; lifts and elevators for your car, etc.

Check out

Maintenance

+ Maintenance modes

We are lift maintenance specialists. We inspect your lift and other lifting devices to ensure the least possible number of incidents and breakdowns through effective **preventive maintenance** in accordance with European regulations.

In addition to preventive maintenance, we conduct **corrective maintenance** to deal with any breakdowns, providing you with security and peace of mind with regard to the use of your lift equipment.

Always aware of your needs.

+ 24-hour service

We will take your breakdown calls to the company from Monday to Sunday, 9 a.m. to 5 p.m, in addition to our 24-hour rescue and emergency service (365 days a year).

Moreover, you will not be charged extra for the visits paid to provide this service.

+ 72-hour service

The phone installed in your lift will enable you to contact us immediately. We check your cabin phone is in good working order every 72 hours from our headquarters.

Modernisation

Is your lift obsolete?

Do you need to modernise the cabin or any of its components?

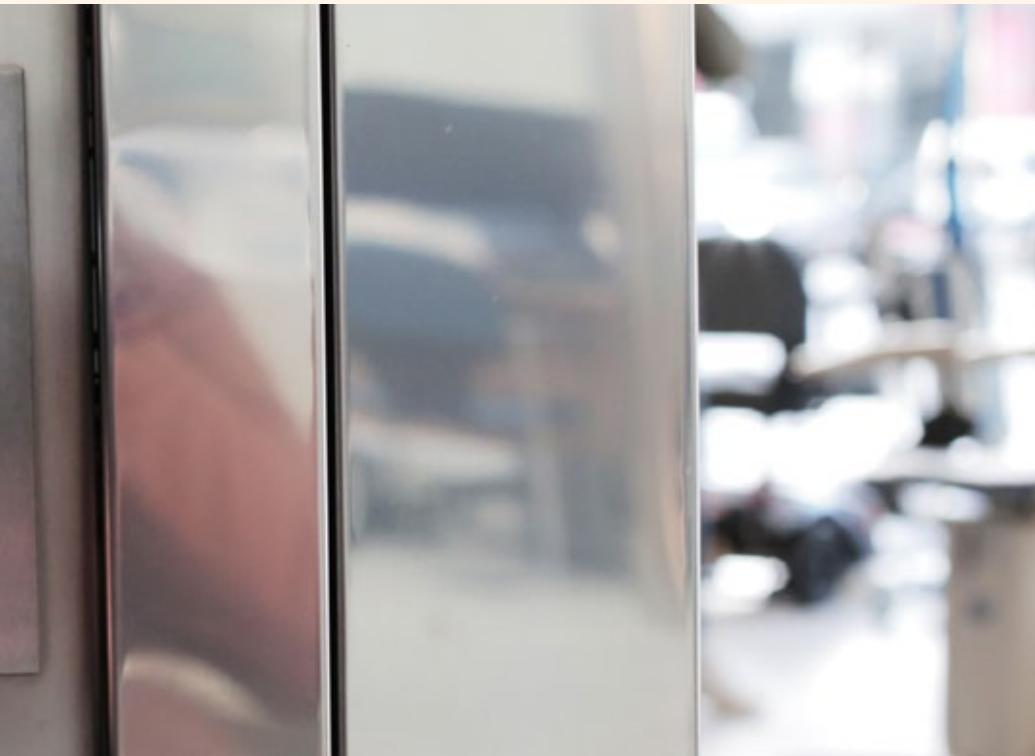

There are many reasons for modernising your lift: to improve your comfort, to make it safer, to save energy, or simply to give it a more contemporary design. We also redesign your entrance hall so that the lift door goes down to street level.

We have a wide range of designs and finishes for cabins, doors, accessories and for the modernisation of your lift, in addition to a large stock of original spare parts.

Components

We at General Lifts have the top-quality components your lift needs, together with the continuous work of the members of our R&D&I department striving to ensure the results meet your expectations.

Accessibility

We are committed to accessibility and as such we have designed push-button panels geared to functional diversity with large horizontal buttons placed at a suitable height, with a braille system, voice synthesizer and a high-contrast display.

Our automatic lift doors are designed in accordance with the premises in which the lift is installed, with perfectly aesthetic integration and built to withstand the large volume of traffic at facilities such as shopping centres, proving maximum operational guarantees.

Why choose General Lifts?
